

XPRT™

Advanced Pulmonary Therapy

Medical

Rental Solutions Delivered by

1 800 STRYKER

Universal | Hospital | Services®

Non-integrated, low air-loss, pressure relieving surface helps prevent and treat skin ulcers

Operate advanced pulmonary functions with the intuitive touch screen interface

Control module allows for therapy history tracking

Turn assist and max inflate capabilities for patient positioning

Surface rotates while bed is flat or with the headrest raised up to 45 degrees

The All-In-One Sleep Surface

Stryker's XPRT sleep surface combines rotation, percussion/vibration, low air-loss and pressure relief for advanced pulmonary therapy and ulcer prevention. The touch screen interface is simple to operate, which helps provide fast delivery of care for critically ill patients. XPRT also delivers superior return on investment by helping to reduce rental expenses.

Intuitive touch screen interface provides simple yet advanced functionality, including therapy history tracking, multi-lingual capabilities and programmable defaults.
